**79,912**  
MILES TRAVELED

**33**  
COUNTIES SERVED

The Caring Foundation of Texas, founded in 1991, seeks to remove the health care disparities that exist throughout Texas. As an organization founded with the vision of collaboration, we seek to bring together people who want to ensure that all Texans have access to preventive healthcare.

By working with partners throughout the state, families are able to thrive because they are healthier. We gather information that allows us to make informed decisions on areas of focus, create local collaborations and secure the resources that addresses the issue. We are continuously focused on strengthening our relationship with current operating partners as well as our community outreach partners with the goal of identifying new initiatives that can have positive impact in the communities we serve.

In 2019, we launched a Chronic Kidney Disease (CKD) initiative to our portfolio to address the high number of adults who are in jeopardy of losing their kidney function. By partnering with the National Kidney Foundation, we are helping to educate at-risk adults about this issue and testing them before they go into kidney failure.

We would not be able to do this work without the generous support of Blue Cross and Blue Shield of Texas and Health Care Service Corporation. Their funding underwrites our administrative expenses which allows 100% of our donations from the public be allocated to direct services in our Texas communities ensuring that we have a healthy future.

## OPERATING PARTNER TESTIMONY

A trucker attended a clinic which was held at the Great American Trucking Show. He stopped because he wanted to follow up on his last year results. In 2018, he said he thought he was living a healthy lifestyle and was feeling good but, because our screening was free, he decided to get screened. He learned that blood pressure was high, and urinalysis was abnormal so he consulted with one of the physicians who explained all the risk factors and gave him tips and brochures on how to live a healthier lifestyle. He followed up with his doctor and was prescribed some medications. This year when he received all his results, they were all normal. He was so thankful and said that because of these free health screenings he is able to keep up with his health.
